

Torque Wrench Calibration

**TEESSIDE
ENGINEERING
& PLANT SERVICES**

Providing you with latest in calibration tools and technology.

At Teesside Engineering & Plant Services, we're committed to investing in the most up-to-date equipment. Our latest acquisition is a Norbar Torque Tools Pro-Test Series 2. The Pro-Test Series 2 is offered as the most comprehensive torque wrench tester on the market today.

We are now able to offer our customers a Declaration of Conformance up to 1,500Nm under ISO 6789:2003. We can also arrange for your equipment to be tested against ISO 6789:2017 standards if required. If you're unsure which standard applies to you, let us know when booking and one of our team can advise you.

Quality Assured

Quality is at the heart of everything we do. We are proud to work with leading brands and suppliers to ensure we deliver the best possible results!
